For AutoCAD LT 2018, see the "Table of contents" section. For more information about AutoCAD 2018, see the "AutoCAD Release 2018" article. In this article: Managing AutoCAD LT and setting up your AutoCAD LT 2018 system Loading Autodesk product keys Accessing Autodesk account features Configuring passwords and security options Creating your first drawing Creating a sketch (non-measuring) drawing Importing paper drawings Creating a drawing based on a template AutoCAD LT and licensing AutoCAD LT 2019 features As a general rule, there are no new features in any AutoCAD LT release. AutoCAD LT 2018 is the same version as in AutoCAD LT 2017. The latest release is AutoCAD LT 2019. AutoCAD LT is freely available to all users who register their products and obtain the proper license key. "Version" refers to the version of AutoCAD LT that is installed on the machine (typically an operating system), and "edition" refers to the edition of AutoCAD that is installed, for example, View, Standard, Drafting. To use a feature in AutoCAD LT, you must first make sure you have the proper edition of AutoCAD LT installed and that you have the proper license key for that edition. To make sure you have the proper edition of AutoCAD LT installed on your machine, you can review the product information in the Installed Products dialog box (view and click the Product Information button), or select the "Installed products" option from the toolbar to open the Installed Products dialog box. If you have any unlicensed, unregistered, or unsupported products installed, you will see the Unregistered, Unlicensed, or Unsupported products section in the dialog box. You can check the license information for a product using the License Information dialog box (view and click the Product Information button), or select the "License Information" option from the toolbar to open the License Information dialog box. To make sure you have the proper edition of AutoCAD LT on your machine,

From Windows Start Menu, type "Autocad" and press "Enter". Autocad is launched. Right-click on your Autocad application icon and choose "Autocad->Trace Settings". NOTE: If you are using a different version of Autocad, the steps for obtaining the key will be different. The Tracing tab is visible. You can choose one of the following three options in "Output file type": 1. Autocad (*.acd) If you are running the latest version of Autocad you can download the Autocad *.acd file. 2. Autocad (*.lcb) If you are running the latest version of Autocad you can download the Autocad *.lcb file. 3. Autocad (*.dcb) If you are running the latest version of Autocad you can download the Autocad *.dcb file. 4. Printable PDF (*.pdf) The ".pdf" file type can be used to print the Trace. NOTE: If you are using a different version of Autocad, the steps for obtaining the key will be different. If you are running the latest version of Autocad you can download the Autocad *.dcb file. Use the "output file path" to locate the autocad file. Copy the autocad file to your hard disk. Register the autocad file with the key generator. How to use the keygen Download the latest Autocad version from Autodesk web site. Run the Autocad installation files. Autocad may warn you about the type of license that you have installed. If this is the case, the following is a quick way to correct the problem. You need to know which license type the autocad installation file was created with. In order to make this determination look at the License agreement and select "About" and then "Get Product Information". The status of your license is listed. The key generator works best with products that are listed as "Activated". NOTE: If you are using a different version of Autocad, the steps for obtaining the key will be different. The license agreement will show the currently active license. You should see: "Activated". For example, if you are running an
