MBRWizard Suite 4.1 Full Crack 21Q: Glow on a material I'm trying to make a material that will make it look like the material in this video. Right now, I'm trying to achieve the effect using a green screen. In the video, you can see that the person is using an app called Lightroom. I'm using Substance Designer. I've basically cut a green screen and applied it to a plane. The result is a material that doesn't look anything like the video. Any idea of how I can get a material that looks like that video? A: Mixor In order to have a greenish material, you first need to add the green color, which you do with a Color Curve node. You then need to make the material grainy. To achieve this, you need to use the Grain node and set it at 2.0. Then
