Converter for all the popular. site provide the Fax converter for PSX and VMS. Quick use. may not run after the conversion, edit the configuration or. KONVERSOR. SIZE OF /CARD, /HEADER.What is Robocoin? This article requires at least 160 points. Robocoin is a hardware-based point of sale (POS) crypto-currency wallet that allows vendors to accept trade payments in Bitcoin and other cryptocurrencies. The Robocoin POS is the only crypto-currency hardware device in the world. Read here How does Robocoin work?

---

Robocoin is a hardware-based POS that combines the use of a hardware device, a Web interface and proprietary software that enables the acceptance of trade payments in Bitcoin and other cryptos. The device itself consists of a USB bitcoin wallet and a special kiosk, which is based on the Raspberry Pi. Robocoin POS allows a user to easily operate a bitcoin kiosk using the Robocoin Software. The Robocoin software and hardware allows for two types of transactions; one-time purchases and withdrawal of crypto-currency. The one-time purchases are an instant transaction while withdrawal requests are made later. The Robocoin POS is a simple and user-friendly product that operates in the background without distraction. The Robocoin POS is suitable for small businesses that have no in-house computer training or desire the overhead of a traditional point of sale software. What is Robocoin's unique selling point? Robocoin's cryptocurrency wallet is the only crypto currency hardware device in the world that does not require a bank
